

TRUST: Why More than 1,800 Institutions Rely On SCRIP-SAFE®

Joseph E. Orndorff, President & CEO, SCRIP-SAFE International

From time to time, we receive inquiries asking about the differences between SCRIP-SAFE® brand security paper and the products of other manufacturers claiming to be “*as good as*” or “*lower priced*” than SCRIP-SAFE®. While we appreciate the compliment, SCRIP-SAFE® provides both tangible and intangible values not offered by our imitators. Much of this value you take for granted because you know that we specialize in protecting the integrity and verifiability of your vital paper records and that we have established the security standards others now try to imitate.

Why do customers trust us? SCRIP-SAFE® was the first company to identify and address academic transcript security concerns. We built an entire company around providing document security and complete service to our customers and we do it better than anyone else!

Why does SCRIP-SAFE® print transcripts in its own facility and maintain a secured chain of custody? Transcripts are academic currency. The government does not farm out its printing to the lowest bidder, *and neither should you!* Our in-plant security procedures protect your transcripts from beginning to end. Document security begins with your printer, not a forms merchant who farms every job to different printers with untested chain of custody procedures.

Why is the Global Document Protection™ security program important to you?

Because no one security feature is adequate to deter a determined fraudster, SCRIP-SAFE® created a suite of security features that when used together offer an extraordinary degree of paper transcript security. Those features include:

Global Watermark Protection®: are trademarked images of translucent globes that are visible from either side of a transcript. Our Global Watermarks can't be photocopied or imitated. Visual verification is simple and instantaneous. Equally important is that all reorders will have the same global watermarks. Transcript reorders from SCRIP-SAFE® will ALWAYS display the same global watermark. The global watermark stops academic fraud before it starts!

IdentiDoc™: is a dual latent security image that incorporates the name of your institution on one line and traditional hidden words, like “COPY or VOID,” on the next. When photocopied it might look like:

STATE UNIVERISTY ● STATE UNIVERSITY
COPY● COPY● COPY● COPY● COPY●

Why is IdentiDoc™ important to you? IdentiDoc™ is a uniquely printed fingerprint that is not available to anyone but your

institution. It differentiates your transcript from a bogus document created on generic security paper.

OrderGuard™ protects your institution from unscrupulous people who attempt to order “*you*” transcript paper from us---by pretending they represent your office! OrderGuard™ is a detailed customer verification procedure developed by our staff to protect you and your institution from having “official bogus transcripts” in the hands of unscrupulous individuals.

SigSAFE™ and SignaSEAL®: the institutional seal and pre-printed signature are printed in a way that causes them to disappear or distort when photocopied.

CAN-SCAN™: the institution name appears in small white type over the face of the entire transcript and disappears or distorts when photocopied.

Test for Document Authenticity Statement: a statement found on the reverse side of the transcript and describes the security features provided by SCRIP-SAFE®.

911 One-Day Emergency Delivery guarantees the option of having 500 transcripts delivered the very next day. Emergencies happen. SCRIP-SAFE protects you during an emergency. Best of all the only charges for this service are for UPS or FedEx delivery. Emergency reorders receive automatic priority status.

SCRIP-SAFE® is a Registered Trademark and protected by Federal trademark law. Its use or misuse by others is illegal. Example: a Registrar called SCRIP-SAFE® indicating that university counsel would not take action against a bogus transcript that used the names of the university and SCRIP-SAFE®. SCRIP-SAFE® took legal action and resolved the issue.

We are document security printers and understand your transcript security requirements. Our trained and friendly staff will explain security features and send you samples. They understand document security issues because that's what they do...all day, every day. We are the recognized experts! We invest time and financial resources with State, Regional and National AACRAO organizations to understand your security needs .

We Are The Transcript Security Experts!
